Likelihood-based tests: two hypothesis families
(A) Directional groups (joint LRTs)
C(JetLag) joint LRT | adjusted for travel duration
p=6.6e-08
0
5
−log10 (p)
(B) Continuous covariate × signed jet lag
Age × signed jet lag
p=0.73
Body mass × signed jet lag
p=0.59
Cumulative starts × signed jet lag
p=0.29
α=0.05 (p=0.05)
